

List of NRC&NPD2021 posters

Poster no.	Presenter	Title of the poster
1	Eleni Ioannou	Studying the loosening effect of secreted, non-hydrolytic fungal proteins on cell wall polysaccharides
2	Elling-Olav Rukke	Rheological characterization of non-dairy alternatives to milk
3	Elling-Olav Rukke	Rheological methods for characterization of liquid soaps and detergents
4	Izumi Sone	Gelation of acid milk gel with and without addition of iota-carrageenan (IC) investigated from macroscopic to microscopic and molecular levels
5	Johanna Andersson	Compression of plant seeds assuming soft spheres
6	Camilo Pedrosa	Wet-granular rheology to measure cuttings-bed strength
7	Sedigheh Borandeh	Viscoelastic Behaviors of Self-Healing Hydrogel Containing Chitosan and Cellulose Nanocrystal for Wound Healing
8	Hossein Baniasadi	3D printing of plant-based hydrogels: a rheology study
9	Sajjad Pashazadeh	Highly Filled Biocomposite: Modelling, Processing, and Characterization
10	Sreejith Sudhakaran Jayabhavan	Enhanced mechanical strength in supramolecular gels induced by salts/ions
11	Jennifer Tersteegen	Recombinant spider silk proteins as a sustainable wet adhesive for cellulose based materials
12	Gilles Kouassi	Effects of trehalose and sucralose on phase separation and decapsulation of eicosapentaenoic acid in biopolymer emulsions
13	Larissa Keßler	Insertion of secondary crosslinking strategies in thermogelling hydrogels
14	Åsa Jerlhagen	Cellulose nanofibrils doped with polymer nanoparticles by PISA
15	Marcus Himmler	Analyzing the transmission of visible light through electrospun nanofibrous PCL scaffolds
